13. ABSTRACT The 2010 Statistical Summaries provides information about the Federal Transit Administration's (FTA) major financial aid programs for Federal Fiscal Year (FY) 2010. The report covers the following programs: Urbanized Area Formula, Non-urbanized Area Formula, Rural Transit Assistance Program, Special Needs for Elderly Individuals and Individuals with Disabilities, Capital, Paul S. Sarbanes Transit in Parks Program, Alternative Analysis, Interstate Substitution, Job Access and Reverse Commute, New Freedom, Over-the-Road Bus, Clean Fuels, Metropolitan Transportation Planning, Statewide Transportation Planning, Consolidated Planning Grants, Emergency Supplemental funding, and State Infrastructure Banks. The data used in this report are compiled from the capital, operating, and planning assistance grants to transit authorities, states, planning agencies, and other units of local government and eligible recipients.

FOREWORD

The 2010 Statistical Summaries provide information about the Federal Transit Administration's (FTA) major financial aid programs for Federal Fiscal Year (FY) 2010. The report covers the following programs: Urbanized Area Formula, Non-urbanized Area Formula, Rural Transit Assistance Program, Special Needs for Elderly Individuals and Individuals with Disabilities, Capital, Paul S. Sarbanes Transit in Parks Program, Alternative Analysis, Interstate Substitution, Job Access and Reverse Commute, New Freedom, Over-the-Road Bus, Clean Fuels, Metropolitan Transportation Planning, Statewide Transportation Planning, Consolidated Planning Grants, Emergency Supplemental funding, and State Infrastructure Banks. The data used in this report are compiled from the capital, operating, and planning assistance grants to transit authorities, states, planning agencies, and other units of local government and eligible recipients.

FY 2003 was the first year that FTA incorporated 2000 census data into its formula apportionments. In this report, obligations (beginning with FY 2003) are reported according to the urbanized area (UZA) code used to obligate the funds. FY 2003–FY 2010 funds were apportioned and obligated to UZAs as defined by the 2000 census. For carryover funds prior to FY 2003, (1) if the UZA name associated with the UZA code changed in the 2000 census (due to mergers, splits, or name change), then the obligations are shown under the new name; or (2) if the UZA was deleted in the 2000 census, the obligations are shown under the old name associated with the obsolete UZA code.

The Statistical Summaries report is organized as follows: Section 1 provides an introduction, a report overview, and a Glossary of Budget Terms. Section 2 presents the FY 2010 Statistical Summaries. The obligation tables include flexible funding from the Federal Highway Administration, unless footnoted otherwise.

This report is available in accessible format on FTA's website at <http://www.fta.dot.gov/data>.

U.S. Department
of Transportation
**Federal Transit
Administration**

Headquarters
1200 New Jersey Avenue S.E.
Washington DC 20590

Dear Colleague:

I am pleased to provide you with a copy of the Federal Transit Administration's (FTA) Fiscal Year (FY) 2010 Statistical Summaries. This comprehensive report presents detailed FY funding data for FTA's major financial aid programs. Use of these funds is identified by program, program element, urbanized area, and state.

Funds obligated to support transit continue to rise. For FY 2010, FTA's grant obligations totaled \$9.7 billion, of which 88% (\$8.5 billion) was for capital expenses. Funds were obligated for the purchase of 7,678 motor vehicles (buses, vans, sedans, station wagons, ferry boats) and 2,134 rail cars, totaling \$937 million and \$595 million, respectively.

The transfer of certain Federal Highway Administration (FHWA) funds to FTA for use in transit projects has continued to play a key role in project funding. The availability of these flexible funds began with the authorization of the Intermodal Surface Transportation Efficiency Act (ISTEA) in FY 1992 and was continued with the passage of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). Transfers totaled \$1.8 billion in FY 2010.

I hope you will find this document useful and informative. Thank you for your continued interest in public transportation.

Sincerely,

A handwritten signature in blue ink, appearing to read "Henrika Buchanan-Smith".

Henrika Buchanan-Smith
Associate Administrator for Program Management

Introduction, Overview, and Glossary

The Fiscal Years 2010 Statistical Summaries presents selected analyzed data on the distribution and use of the following programs administered by the Federal Transit Administration (FTA):

- **Capital Program (49 U.S.C. § 5309)** provides capital funding for fixed guideway modernization, new starts, and bus and bus-related projects.
- **Urbanized Area Formula Program (49 U.S.C. § 5307)** provides funding for capital, planning, and operating projects for urbanized areas (50,000 or more population).
- **Elderly Persons and Persons with Disabilities Program (49 U.S.C. § 5310)** allocates funding to the states for capital projects to meet the special needs of elderly persons and persons with disabilities.
- **Non-urbanized Area Formula Program (49 U.S.C. § 5311)** funds capital and operating assistance in non-urbanized areas (rural and small urban). The Rural Transit Assistance Program (RTAP) provides funding for training, technical assistance, research, and support services in these areas.
- The **Tribal Transit Program** makes funds available to federally-recognized Indian tribes or Alaska Native villages, groups, or communities as identified by the Bureau of Indian Affairs (BIA) in the U.S. Department of the Interior for public transportation capital projects, operating costs and planning activities that are eligible costs under the Non-urbanized Area Formula Program (Section 5311).
- **Job Access/Reverse Commute Program (49 U.S.C. § 5316)** increases transit service to employment opportunities.
- **New Freedom (49 U.S.C. § 5317)** provides new transit service and transit alternatives beyond those currently required by the American with Disabilities Act (ADA) of 1990.
- **Over-the-Road Bus Program** provides funds to help operators of over-the-road bus service comply with U.S. DOT's final rule on accessibility for over-the-road buses.
- **Clean Fuels Grant Program (49 U.S.C. § 5308)** was created to encourage the use of clean fuel vehicles. The obligation of FY 2006 Clean Fuels funds marks the first time that projects using the program's funds can be specifically identified. In FY 2005 and prior years, Clean Fuels funds were merged with the Bus category of the Capital Program and cannot be tracked independently.

- **Miscellaneous FHWA Transfer Projects** were transit projects funded by Congress under general provisions in DOT Appropriations Acts for FYs 2002–2006.
- **State Infrastructure Banks** allow a state to provide loans or other credit assistance for projects.
- **Metropolitan Transportation Planning Program (49 U.S.C. § 5303)** provides funding to the states for planning projects in urbanized areas.
- **Statewide Transportation Planning Program (49 U.S.C. § 5304)** provides funding to the states for state planning and research.
- **Consolidated Planning Grants** allow states to combine FHWA and FTA funds as a single grant.
- **Alternative Transportation in Parks and Public Lands (49 U.S.C. § 5320)** funds capital and planning expenses for alternative transportation systems in federally-managed parks and public lands.
- **Alternative Analysis (49 U.S.C. § 5339)** provides funding to eligible entities to develop studies as part of the transportation planning process.

The total amount obligated for the above programs in FY 2010 was \$9.7 billion. About 87 percent was obligated under the two largest programs: Capital Program (37%) and Urbanized Area Formula Program (50%). Of the total \$9.7 billion, about 88 percent was programmed for capital, 10 percent for operating, and 2 percent for planning. Within the total capital obligations of \$8.5 billion, 40 percent was used for bus and bus-related activities, 30 percent for fixed guideway, and 18 percent for New Starts. In FY 2010, FTA funded the purchase of 7,678 motor vehicles. The dollar amount obligated for motor vehicle purchases was \$937 million. The purchase of 2,134 rail cars was funded with \$595 million. Obligations for preventive maintenance were about \$1.6 billion (bus, \$1.310 billion; rail, \$334 million).

Other FTA Programs

While the major portion of FTA funding is for transit capital and operating assistance, financial support is also provided for a variety of other programs that are described below.

University Transportation Research Program (49 U.S.C. § 5505)

FTA currently provides funding to four universities selected as University Transportation Centers to perform cutting-edge research in transit disciplines and technologies. In addition to producing research results, the program trains graduate students as the next generation of professionals to lead transit research, planning, and operations. Contact: Office of Research, Demonstration and Innovation, (202) 366-4047.

National Research and Technology Program (49 U.S.C. § 5314(a))

The mission of FTA is to improve public transportation for America's communities. FTA seeks to deliver products and services that are valued by its customers and to assist transit agencies in better meeting the needs of their customers. To accomplish these goals, FTA partners with the transportation industry to undertake research, development, and education that will improve the quality, reliability, and cost-effectiveness of transit in America and lead to increases in transit ridership.

Historically, FTA's efforts in research and technology have been categorized as follows:

- *Joint Partnerships*: FTA enters into agreements with both public and private research organizations, transit providers, and industry to promote the early deployment of innovation in public transportation services, management, operational practices, and technology of broad applicability. An example is the current effort to develop high-priority rail transit standards for commonality in design and operations, which promises a number of direct and indirect benefits to operators and suppliers. Another example is FTA's effort to partner with the industry in identifying and disseminating best practices for reducing and controlling costs and schedules for major transit construction projects.
- *Advanced Technologies*: FTA assists in the study, design, and demonstration of fixed-guideway technologies, bus and bus rapid transit (BRT) technologies, fuel-cell-powered transit buses, advanced propulsion control for rail transit, and other types of technologies in development.

FTA encourages, in particular, activities for reducing the life-cycle costs of vehicles, systems, and facilities. FTA is working to accelerate the commercial

introduction of low-emission, high-efficiency transit vehicles, in direct support of the President's hydrogen fuel initiative. Similarly, FTA is collecting, analyzing, and disseminating objective information on the performance of hybrid-electric and other clean-fuel buses and is providing technical assistance to the National Park Service in planning and instituting transit systems in U.S. national parks.

- *International Mass Transportation Program*: FTA promotes American transit products and services overseas and cooperates with foreign public-sector entities on research and development in the public transportation industries. Trade missions and other international gatherings enable American vendors to showcase their products and services and to facilitate technology transfer and information diffusion for developing nations.

Information on FTA research and technology programs is available on FTA's website at www.fta.gov/research. Contact: Office of Research, Demonstration and Innovation, (202) 366-4047.

Transit Cooperative Research Program (49 U.S.C. § 5313(a))

Through the Transit Cooperative Research Program (TCRP) of the Transportation Research Board (TRB), FTA funds research directed to local problem-solving in service concepts, vehicles and equipment, operations, human resources, maintenance, policy, and administrative practices. The TCRP "synthesis" reports summarize best industry practices and have proven very useful to transit operators. More than 413 products of TCRP research have been delivered to public transportation communities. TRB, which administers the TCRP, maintains a publications list and description of all TCRP studies on its website at <http://www4.trb.org/trb/crp.nsf/TCRP+projects>. One copy of each TCRP product is available free of charge from the American Public Transportation Association (APTA), which maintains the TCRP online website at <http://www.tcrponline.org>. Contact: Lisa Colbert, Office of Research, Demonstration and Innovation, (202) 366-9261.

National Transit Institute (NTI) (49 U.S.C. § 5315)

Through the National Transit Institute (NTI), FTA develops and offers training courses for improving transit planning, operations, workforce performance, and productivity. NTI courses are conducted at sites across the United States on a wide variety of subjects, ranging from multimodal planning to management development, third-party contracting, safety, and security. Current NTI course offerings are available online at <http://www.ntionline.com/>. Contact: Office of Research, Demonstration and Innovation, (202) 366-4047.

Glossary of Budget Terms

Allocation	Distribution of Budget Authority made available by administratively-prescribed procedure or process. Also includes distribution based on Congressional earmarks.
Apportionment	Distribution of Budget Authority made available by statutory formula or procedure prescribed in law. An apportionment divides amounts available for obligation by a specific time period (usually quarters), activities, projects, objects, or a combination thereof. The amounts so apportioned limit the amount of obligations that may be incurred (FTA's apportionment formulas are based on census data and transit service factors).
Appropriation Act	A statute that generally provides legal authority for federal agencies to incur obligations and to make payments out of Treasury for specified purposes. An appropriation act generally follows enactment of authorizing legislation unless the authorizing legislation provides budget authority.
Authorization Act	Substantive legislation that sets up or continues the operation of a federal program or agency either indefinitely or for a specific period of time or that sanctions a particular type of obligation or expenditure within a program.
Budget Authority	Authority provided by law to enter into financial obligations that will result in immediate or future outlays involving federal government funds. Budget Authority can be based on General Funds from the Treasury or Contract Authority from Trust-Funded resources.
Contract Authority	Authority that permits obligations to be incurred in advance of appropriations or receipts.
Fiscal Year (FY)	Any yearly accounting period, regardless of its relationship to a calendar year. The fiscal year for the Federal Government begins on October 1 of each year and ends on September 30 of the following year. (Prior to fiscal year 1977, the federal fiscal year began on July 1 and ended on June 30.)

Obligation Limitation	A restriction on the amount of budgetary resources that can be obligated or committed for a specific purpose.
Non-urbanized Area	An area not included within an urbanized area boundary as defined by the Bureau of Census. Can include both rural and small urban areas with population less than 50,000.
Obligations	Amounts of orders placed, contracts awarded, service received, and similar transactions during a given period that will require payments during the same or a future period. In this report, obligations refer to grants awarded by FTA.
States	As defined in Chapter I of Title 23, the 50 states comprising the United States, plus the District of Columbia and the Commonwealth of Puerto Rico. However, for the purposes of some programs (e.g., Section 5311, Section 5310, and RTAP), the term may also include territories (Virgin Islands, Guam, American Samoa, and Northern Marianas Islands).
Urbanized Area	Comprises an incorporated place and adjacent densely-settled surrounding area that together have a minimum population of 50,000.
Trust Fund	A fund credited with receipts that are earmarked by law and held in trust or in a fiduciary capacity by the Government for use in carrying out specific purposes and programs in accordance with an agreement or a statute.

Note:
Metropolitan Planning obligations reported in the >1M population group also include obligations for all areas <1M population.
Non-urbanized Area Formula capital includes Project and State Administration; Operating includes Intercity Bus Program Reserve.
State Infrastructure Bank, National RTAP, and Oversight obligations are not included. Urb. Area Formula operating obligations for areas >1M popul. are from carryover funds and CMAAQ.
Does not include management training (\$72,532) and Research Projects (\$1,408,077).

NOTE: Includes all programs.
Total Capital Obligations include Bus, Bus Facilities, Fixed Guideway, and New Starts obligations. Preventive maintenance and ADA Paratransit are subcategories of those major capital categories. ADA Paratransit obligations meet the TEA-21 eligibility requirements that allow non-fixed paratransit service to be counted as a capital item.

Urbanized Area Formula Program (49 U.S.C. § 5307)

Section 5307 is a formula grant program for urbanized areas providing capital, operating, and planning assistance for mass transportation. This program was initiated by the Surface Transportation Act of 1982 and became FTA's primary transit assistance program in FY 1984. Funds are apportioned to urbanized areas (UZAs) using a formula based on population, population density, and other factors associated with transit service and ridership.

Section 5307 Urbanized Area Formula funds are available for transit improvements for 38 urbanized areas over 1 million population, 114 urbanized areas with populations between 200,000 and 1 million, and 314 urbanized areas between 50,000 and 200,000 population (which includes 313 designates as such by the Census Bureau and the Virgin Islands, which is treated as an urbanized area in accordance with language in SAFETEA-LU). For urbanized areas over 200,000 in population, funds flow directly to the designated recipient. For areas under 200,000, the funds are apportioned to the Governor of each state for distribution.

Language in TEA-21 and SAFETEA-LU requires that one percent of Section 5307 funds apportioned to an urbanized area with a population of 200,000 or more be used for transit enhancement projects that physically or functionally enhance transit service or use. SAFETEA-LU also requires that one percent of funds be made available for a Section 5307 set-aside, which is apportioned to small urbanized areas using selected performance criteria under the Small Transit Intensive Cities. In addition, funds apportioned to urbanized areas under the Section 5340 Growing States and High Density States formula (which use forecasted population and population/population density factors, respectively) are combined with Section 5307 funds.

Preventive maintenance, defined as all maintenance costs, is eligible for FTA capital assistance at an 80 percent Federal share. FY 2010 operating assistance is available to all urbanized areas with a population under 200,000. It is also available to eligible urbanized areas that crossed over the 200,000 population threshold for the first time under the 2000 Census and is available for use in that portion of a 2000 Census UZA with a population of 200,000 or more that was nonurbanized under the 1990 Census, in accordance with Sec. 7(n) of Pub. L. 108-263. In addition, an exception in TEA-21 made operating assistance available in urbanized areas of 200,000 or more in population, where transit providers provide only service exclusively to elderly persons and persons with disabilities.

In FY2010, a total of \$4.8 billion in Section 5307 funds were obligated. Of this amount, \$4.4 billion or 91 percent was used for capital, \$395 million or 8 percent

for operating, and \$61 million or 1 percent for planning assistance. Funds were obligated to FTA grantees. As a group, the urbanized areas with population over 1 million obligated the largest share of the funds, \$3.5 billion or 73 percent. A total of \$569 million of Section 5307 funds was obligated for the purchase of a total number of 3,172 vehicles.

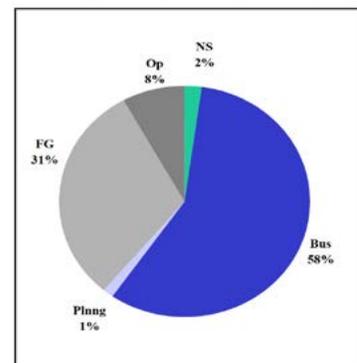

As in previous years, flexible funds transferred from the Federal Highway Administration (FHWA) had a significant impact on the availability of funds for obligation. In FY 2010, a total of \$1.6 billion was transferred to the Urbanized Area Formula Program. The total flexible funds obligated for this program were \$932 million, some of which were carryover of funds that were transferred in prior years. The program sources of these obligations are Congestion Mitigation and Air Quality (CMAQ), \$985 million (56%); Surface Transportation Program (STP), \$713 million (39%), and \$98 million (5%) in other transfers.

TOTAL All UZAs	\$1,310,198,002	79.7	\$334,702,070	20.3	\$1,644,900,072	100.0	\$4,394,854,483	37.4

NOTE: Bus preventive maintenance obligations are included in Bus Other in Table 16; rail PM is included in Fixed Guideway.
 % of Total percentages are based on the TOTAL preventive maintenance obligation of \$1,644,900,072. Bus and rail %s are based on the UZA total PM.
 Total capital obligations = Total Bus + Fixed Guideway + New Starts obligations from Table 16.
 Below SUBTOTALS: capital obligations and the % of PM obligations are shown based on the entire population group (including areas without PM).

Preventive Maintenance Obligations, by Type

Preventive Maintenance Obligations, by Population Category

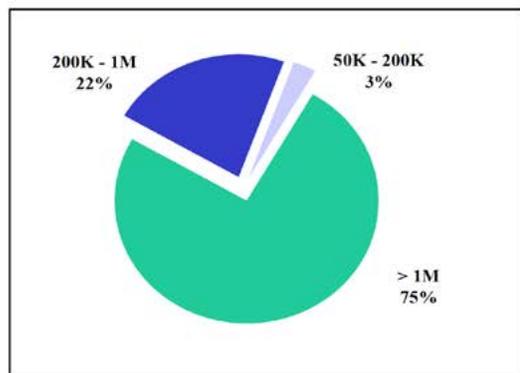

Table 18 FY 2010 Transit Enhancement Obligations, Section 5307 Urbanized Area Formula Program

Category	Bus	Rail	New Starts	Total	Percent of Total

NOTE: "Other" category includes dual mode bus, ferry, commuter bus, intercity bus, and used bus. If quantity = 0, funds are supplemental to a previous purchase. A negative obligation indicates that a budget amendment to previously obligated funds shifted the commitment of funds out of one category (i.e. the negative balance) to another category.

Clean Fuels Grant Program (49 U.S.C. § 5308)

The Clean Fuels Grant program was created to finance the purchase or lease of clean fuel buses and associated facilities and the improvement of existing facilities to accommodate clean fuel buses. Up to 25 percent of the funds for this discretionary program may be used for “clean diesel” buses. A bus built with lightweight composite materials can also be qualified as a clean fuels bus for this program.

A significant number of clean fuel bus and facilities projects are designated in SAFETEA-LU. Clean Fuels funds transferred to the Bus and Bus Facility program become indistinguishable and, therefore, all obligations for these funds cannot be tracked independently.

In FY 2010, a total of \$18 million was exclusively obligated for the Clean Fuels Program. A total of \$6 million of the Section 5308 funds were obligated for the purchase of 23 vehicles.

			100.0	0.0		65.2		8.7		0.0		26.1		0.0	

Note: Does not include funds transferred into the section 5305 Bus and Bus Facilities Program. Total obligation include \$225,845 (Project Administration and Contingencies/Program Reserve).

Capital Program (49 U.S.C. § 5309)

The Section 5309 program provides funding for the establishment of new rail or busway projects (new starts), the improvement and maintenance of existing rail and other fixed guideway systems that are more than seven years old, and the upgrading of bus systems. Capital assistance grants made to states and local agencies are funded up to 80 percent of the net project costs, unless the grant recipient requests a lower Federal grant percentage. In FY 2010, the Section 5309 obligations totaled about \$3.6 billion. The total number of bus and related vehicle purchases budgeted in FY 2010 was 1,223.

Bus and Bus-Related

This category includes acquisition of bus and rolling stock and ancillary equipment and the construction of bus facilities (i.e., maintenance facilities, garages, storage areas, bus terminals, etc.). At least 5.5 percent of Section 5309 bus funds must be used in non-urbanized areas. In FY2010, 18 percent was obligated for projects in non-urbanized areas. In FY 2010, the Section 5309 obligations for bus were \$569 million. The funding appropriated for the bus capital program is fully allocated to projects designated by Congress.

Fixed Guideway Modernization

The formula for allocating the fixed guideway modernization consists of seven tiers. The allocation of funding under the first four tiers is allocated based on data used to apportion the funding in fiscal year 1997. Funding in the last new tiers is apportioned based on the latest available route miles and revenue vehicle miles on segments at least seven years old, as reported to the National Transit Database (NTD), rather than on route miles and revenue vehicle miles on entire systems that are seven years old, as was the case before TEA-21 and SAFETEA-LU. Typically funded are infrastructure improvements such as track and right-of-way rehabilitation, station modernization, rolling stock renewal, safety-related improvements, and signal and power modernization. In FY 2010, the Section 5309 obligations for fixed guideway modernization were \$1.36 billion.

New Starts

New Starts funding provides for design and construction of new fixed guideway systems. FTA writes recommendations to Congress for new starts funding in the annual New Starts Report. The funding recommendations contained in this report are the result of an extensive project development and evaluation process. FTA is required to evaluate each proposed New Starts project according to a series of criteria for project justification and local financial commitment. As projects proceed through the stages of the planning and project development process, they are evaluated against the full range of statutory

criteria. The evaluation will result in a rating of “Highly Recommended” or “Not Recommended” for each project.

In FY 2010, funding for New Starts projects was fully allocated by Congress. The obligations for Section 5309 New Starts projects were \$1.64 billion.

NOTE : Bus preventive maintenance obligations are included in Bus Other in Table 26; rail PM is included in Fixed Guideway.
 Bus and rail %s are based on the UZA total PM.
 Total capital obligations = Total Bus + Fixed Guideway + New Starts obligations from Table 26.
 Below SUBTOTALs: capital obligations and the % of PM obligations are shown based on the entire population group (including areas without PM).

Special Needs for Elderly Individuals and Individuals with Disabilities Program (49 U.S.C. § 5310)

Section 5310 makes funds available to meet the special transportation needs of elderly persons and persons with disabilities. These funds are apportioned to the states annually by a formula that is based on the number of elderly persons and persons with disabilities in each state. In FY 2010, \$133 million was appropriated for the Section 5310 program. The program is administered through the states, and it is at the state level that specific funding decisions are made.

Capital assistance is provided on an 80 percent Federal, 20 percent local matching basis, except vehicle-related equipment needed to meet Americans with Disabilities Act (ADA) and Clean Air Act Amendment (CAAA) requirements, which is fundable on a 90 percent Federal, 10 percent local matching basis. Those eligible to receive Section 5310 funding include private non-profit agencies, public bodies approved by the State to coordinate services for elderly persons and persons with disabilities, or public bodies that certify to the Governor that no non-profit corporations or associations are readily-available in an area to provide the service.

With the enactment of SAFETEA-LU, FTA established a three-year period of availability for Section 5310 funds. Any amount of a state's apportionment remaining unobligated may be transferred to the Section 5311 or the Section 5307 program during the fourth quarter of the fiscal year. Usually, any Section 5310 funds left unobligated or not transferred at the end of the period of availability are reapportioned among all the states in a subsequent year's apportionment.

Since the program began in 1975, state agencies have obligated billions for the purchase of vehicles, equipment, or service designed to meet the needs of elderly persons and persons with disabilities. The Section 5310 program has enabled thousands of these persons to achieve greater mobility and independence.

Non-urbanized Area Formula Program (49 U.S.C. § 5311)

The Section 5311 program provides funding for public transportation in non-urbanized areas. From fiscal year 1979, when the program was authorized, until fiscal year 1991, Congress appropriated \$65–85 million annually for the program. Annual appropriations increased under ISTEA, with Section 5311 receiving 5.5 percent of the total appropriation for urbanized and non-urbanized areas, and again under TEA-21, with Section 5311 receiving 6.37 percent of the funds appropriated for formula programs for both urbanized and non-urbanized areas and for elderly and persons with disabilities. Under SAFETEA-LU in fiscal year 2010, more than \$439 million was appropriated and also supplemented with Section 5340 funds. In addition, since 1984, Section 5311 has been supplemented by funds transferred annually to Section 5311 from the Governor's apportionment of urbanized area formula funds for cities under 200,000.

FTA apportions funds for non-urbanized areas to the states according to a statutory formula based on each state's population in rural and small urban areas (under 50,000 in population). The funds are available to the state for obligation for the year of apportionment plus two additional years. The states administer the program in accordance with State Management Plans. Eligible recipients include public bodies and private non-profit organizations. Participation by private for-profit enterprises under contract to an eligible recipient is encouraged.

FTA financial assistance may be used for capital and administrative expenses, with a Federal share of 80 percent, and for operating expenses, with a Federal share of 50 percent. The state may use up to 15 percent of its apportionment for program administration, planning, and technical assistance, with no local match required. Coordination with other federally-assisted transportation services is encouraged, and income received through purchase of service contracts with human service agencies may be used as local match. Each state must spend 15 percent of its apportionment for the support of intercity bus transportation, unless the Governor certifies that the intercity bus transportation needs of the state are adequately met.

In FY 2010, \$647.7 million was obligated under the Section 5311 program on behalf of numerous subrecipients.

Rural Transit Assistance Program (RTAP)

From fiscal years 1987 to 2005, Congress appropriated \$4.25–\$5.25 million per year for the state Rural Transit Assistance Program (RTAP) to provide training, technical assistance, research, and related support services for providers of rural public transportation. SAFETEA-LU directs a two percent takedown of funds appropriated for Section 5311 for RTAP. FTA allocates funds to the states using the non-urbanized population-based formula along with a floor of \$65,000 to each state (increased from \$50,000 in FY 1999) and \$10,000 to each insular area. There is no local share requirement. Additional RTAP funds are used to support a national program that produces training materials and operates a national resource center. FTA obligated \$9 million to the states in FY 2010.

Job Access and Reverse Commute Program (49 U.S.C. § 5316)

The Job Access and Reverse Commute (JARC) program was designed to increase access to jobs and employment sites. Job Access projects provide new or expanded transportation service designed to fill gaps that exist for welfare recipients and other low-income individuals to and from jobs and other employment-related services. Reverse Commute projects facilitate the provision of new or expanded public mass transportation services for the general public from urban, suburban, and rural areas to suburban work sites.

Localities have wide flexibility in selecting service strategies that are appropriate to their areas, including late-night and weekend service, guaranteed ride home service, shuttle service, expansion of fixed-route mass transit routes, demand-responsive van service, ridesharing and carpooling activities, bicycling, and local car-loan programs that assist individuals in purchasing and maintaining vehicles for shared rides. Capital and operating costs for such projects are eligible. Matching funds may include those from other Federal programs, such as the Department of Health and Human Services' Temporary Assistance to Needy Families (TANF) and the Department of Labor's Work Force Investment Act (WIA).

In FY 2010, \$164.5 million was made available for the JARC program. During FY 2010, funds totaling \$165 million were obligated under the 5316 program.

Over-the-Road Bus Program

The Over-the-Road Bus program is designed to help operators of over-the-road buses finance the capital and training costs of complying with the U.S. DOT's final rule regarding accessibility of over-the-road buses required by ADA. Eligible projects include the incremental cost of adding a lift to a new bus, retrofit of a bus to add a lift, and training.

In FY 2010, applications were reviewed and selected on a competitive basis. Several factors were considered: (1) the need for over-the-road bus accessibility in the areas served, (2) the extent to which the applicant demonstrates innovative strategies and financial commitment, (3) the extent to which the operator acquires equipment required by the final rule prior to any required timeframe, (4) the extent to which financing the costs of compliance presents a financial hardship for the applicant, and (5) the impact of accessibility requirements on the continuation of over-the-road bus service, with particular consideration of the impact of the requirements on service to rural areas and for low-income individuals. Other factors, such as fleet size and prior-year funding, were also considered.

A total of \$544,000 was obligated for the program in FY 2010. The projects selected provided funding for the incremental cost of adding lifts to new vehicles, retrofitting vehicles, and training employees in the use of accessible equipment. The \$544,000 obligated during FY 2010 included projects selected in previous fiscal years. In FY 2010, the Federal share of a grant under this program was 90 percent for all providers.

Because the Over-the-Road Bus Program provides funds to intercity bus providers, the service area for any grantee may include any or all of the population categories used to report FTA obligation data: large, medium, or small urbanized areas or non-urbanized areas. As defined by "intercity," the service provided by any grantee always includes more than one area. Since the funding cannot be tied to any particular area or population category, obligations cannot be reported that way. For this program, obligations are reported by grantee. In the summary tables (by state), the obligations are listed according to the state in which the grantee's headquarters office is located.

Table 44 FY 2010 Over-the-Road Bus Program Obligations

Metropolitan Transportation Planning Program (49 U.S.C. §5303)

Metropolitan Transportation Planning Program (MTPP) funds are available to carry out the transportation planning process and meet the programming requirements of the joint FTA/FHWA planning regulations, "Planning Assistance and Standards," 23 C.F.R. Part 450 and 49 C.F.R. Part 613. FTA apportions MTPP funds to the states based on a set of formulas: 80 percent of the funds available is apportioned according to an urbanized area population-based formula; the remaining 20 percent is provided to the states based on an FTA administrative formula to address planning needs in larger, more complex urbanized areas with one million or more population. Acting as the FTA grantees, the states distribute these funds to each Metropolitan Planning Organization (MPO) within the state. All states have either reaffirmed or developed in consultation with their MPOs allocation formulas that are used to distribute the funding.

The MTPP provides financial assistance, through the states, to MPOs to support the costs of preparing long-range transportation plans (LRTPs) and financially-feasible transportation improvement plans (TIPs) required as a condition of obtaining Federal transit funding.

In FY 2010, FTA obligated almost \$ 165 million for metropolitan planning.

Statewide Transportation Planning Program (49 U.S.C. §5304)

The Statewide Transportation Planning Program (STPP) is a source of Federal financial assistance to the states for statewide transportation planning and other technical assistance activities; planning support for non-urbanized areas; research, development, and demonstration projects; fellowships for training in the public transportation field; university research; and human resource development. The specific requirements of statewide transportation planning are set forth in 49 U.S.C. 5304 and further explained in 23 C.F.R. Part 450 and 49 C.F.R. Part 613. As with the MTPP, the state is the FTA grantee for this program.

In FY 2010, FTA obligated almost \$97 million for statewide planning.

Emergency Supplemental Obligations

Emergency supplemental appropriations passed by Congress since fiscal year 2001 have provided significant funding for transit system improvements. This includes projects or funding in response to the September 11, 2001, terrorist attacks, Hurricane Katrina disaster relief, and other significant purposes.

In FY 2010, about \$3.7 million was obligated as Emergency Supplemental grants.

Alternative Analysis Program (49 U.S.C. § 5339)

SAFETEA-LU established the Alternatives Analysis program under 49 U.S.C. § 5339. The program provides grants to states, authorities of the states, MPOs, and local government authorities to develop studies as part of the transportation planning process. These studies include an assessment of a wide range of public transportation alternatives designed to address a transportation problem in a corridor or subarea, sufficient information to enable the Secretary to make the findings of project justification and local financial commitment required, the selection of a locally preferred alternative, and the adoption of the locally preferred alternative as part of the state or regional LRTP.

Unless otherwise specified in law, grants made under the Alternatives Analysis program must meet all other eligibility requirements as outlined in Section 5309. Eligible projects include planning and corridor studies and the adoption of locally preferred alternatives within the fiscally-constrained Metropolitan Transportation Plan for that area. Funds awarded under the Alternatives Analysis Program must be shown in the Unified Planning Work Program (UPWP) for MPOs with responsibility for that area.

The Government's share of the cost of an activity funded may not exceed 80 percent of the cost of the activity.

In 2010, \$15.5 million was obligated for Alternative Analysis projects.

Paul S. Sarbanes Transit in the Parks Program (49 U.S.C. § 5320)

SAFETEA-LU established the Alternative Transportation in Parks and Public Lands (ATPPL) program under 49 U.S.C. § 5320. The program is administered by FTA in partnership with the Department of the Interior (DOI). The purpose of the program is to enhance the protection of national parks and Federal lands and increase the enjoyment of those visiting them. DOI, after consultation and in cooperation with FTA, determines the final selection and funding of projects.

The program funds capital and planning expenses for alternative transportation systems such as buses and trams in federally-managed parks and public lands. Ten percent of the funds are reserved for administration and technical assistance. Federal land management agencies and state, tribal, and local governments acting with the consent of a Federal land management agency are eligible to apply.

Projects are competitively selected. Projects must conserve natural, historical, and cultural resources, reduce congestion and pollution, and improve visitor mobility and accessibility. No more than 25 percent may be allocated for any one project.

In FY 2010, \$7.5 million was obligated under this program in grants.

New Freedom Program (49 U.S.C. § 5317)

SAFETEA-LU established the New Freedom program under 49 U.S.C. 5317. The program provides formula funding for new public transportation services and public transportation alternatives beyond those required by ADA that assist individuals with disabilities with transportation, including transportation to and from jobs and employment support services.

By law, FTA allocates 60 percent of funds available to UZAs with populations of 200,000 or more persons (large UZAs), 20 percent to the states for urbanized areas with populations ranging from 50,000 to 200,000 persons (small UZAs), and 20 percent to the states for rural and small urban areas with populations of less than 50,000 persons. FTA apportions funds based upon the number of persons with disabilities over the age of five residing in a state or large urbanized area using data from the 2000 Census.

The Federal share is 80 percent of capital expenses and 50 percent of operating expenses. Funds provided under other Federal programs (other than those of the U.S. DOT) may be used for local/state match for funds provided under Section 5317, and revenue from service contracts may be used as local match.

States and Designated Recipients may use up to 10 percent of their annual apportionment to administer, plan, and provide technical assistance for a funded project. No local share is required for these program administrative funds.

During FY 2010, funds totaling \$90.1 million were obligated to grantees.

Miscellaneous Federal Highway Administration Transfer Projects

Section 330 of the FY 2002 DOT Appropriations Act provided funds for certain surface transportation projects identified in the conference report accompanying that act. Additional projects were specified in the conference report accompanying the FY 2003 DOT Appropriations Act. Section 115 of the FY 2004 DOT Appropriations Act and Section 117 of the 2005 Appropriations Act Section 112 of the 2006 Appropriations Act similarly provided funding for surface transportation projects specified in the conference report.

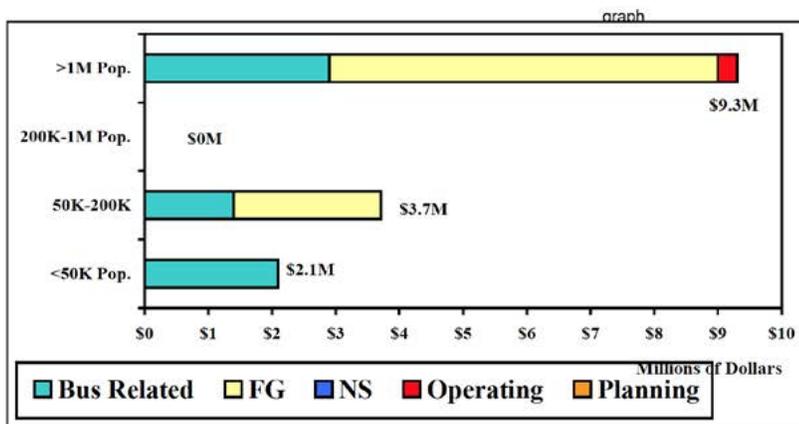

FHWA is responsible for managing the funds but has allotted FTA an amount sufficient to cover funds designated for surface transportation projects that have been determined to be transit in nature. Funds for these transit projects are in addition to the amounts guaranteed under Chapter 53 of Title 49, U.S.C., and are available until expended. Provided the project description falls within the definition of a surface transportation project, the Federal share of the project cost is 100 percent. The funds may be obligated for planning, capital or, in some cases, operating expenses.

In FY 2010, \$15.1 million was obligated to grantees.

Flexible Funds

The 1991 ISTEA legislation contained provisions that provided flexible funding opportunities to state and local governments, allowing them the option of using some FHWA funds for transit projects, and vice versa. These provisions were contained and continued with the passage of TEA-21 in FY 1998. However, beginning in FY 2000, FHWA and FTA implemented new procedures that provided for the transfer of obligation authority to the receiving agency. Funds can be transferred from FHWA to Sections 5307, 5310, 5311, 5313(b), and the Interstate Substitute Program to support transit projects and from FTA's Section 5307 to FHWA to support highway projects. During the past 16 years, billions have been transferred from FHWA, including funds obligated by FTA for transit projects.

- **Surface Transportation Program (STP)** – STP is the largest source of funds from FHWA. Funding is at 80 percent Federal share and may be used for all projects eligible for funds under current FTA programs excluding operating assistance.
- **Congestion Mitigation and Air Quality Improvement (CMAQ) Program** – CMAQ funds are used to support transportation projects in air quality non-attainment areas. A CMAQ project must contribute to the attainment of the national ambient air quality standards by reducing pollutant emissions from transportation sources.
- **Interstate Substitute Funds** – While these Highway funds are eligible for transit use, they are limited to the construction and improvements of fixed guideways, the purchase of rolling stock (buses) and other transportation equipment, and any other project eligible under FTA's Section 5309 capital grant program.
- **FHWA Earmark** – Several transit projects are earmarked under TEA-21 and SAFETEA-LU as high-priority projects. FHWA asked that they be administered by FTA. FHWA-earmarked funds through FY 1999 were transferred into the Section 5309 program. From through FY 2000–2010, these earmarks were transferred to FTA's formula programs only.
